Profile

Full Stack Developer with hands-on experience building scalable, high-performance web applications using Next.js, React.js, TypeScript, Node.js, and MongoDB. Currently completing the ITI 9-Month Open Source Program (Intake 46) following an NTI MEAN Stack government scholarship. Combines solid engineering fundamentals with real-world teaching experience, having trained 100+ students in Programming and Front-End Development through government-backed initiatives.

Education

Matrouh University

Sep 2021 – Jun 2025

Bachelor's Degree in Computer Science, Faculty of Computers and Artificial Intelligence

Work Experience

Front-End Development Instructor - Intelligo

Aug 2025 – Sep 2025

Delta Higher Institute for Engineering and Technology, Talkha

- Delivered a 24-hour foundational Front-End Development course to 10+ university students from non-technical backgrounds.
- Taught web fundamentals (HTTP, DNS, HTML, CSS, JavaScript) using simplified, hands-on teaching methods.

Programming Instructor - Digital Egypt Cubs Initiative (DECI)

Aug 2024

MCIT in collaboration with Udacity, Mansoura

- Taught two summer camp groups (60+ students total) over 6-day immersive sessions.
- Delivered the 5 Stages of Design Thinking (Empathize, Define, Ideate, Prototype, Test) through interactive, team-based activities.
- Achieved a 90%+ project completion rate through hands-on exercises that strengthened logical thinking and problem-solving skills.

Training & Diplomas

Open Source Application Development Trainee - ITI

Oct 2025 – Present

9-Month Program, Intake 46, Mansoura

Hands-on projects across Node.js, React.js, Angular, Vue.js, PHP, Laravel, Python, MongoDB, and MySQL; application security (HTTP/HTTPS, SQL Injection with SQLMap, Wireshark traffic analysis); Agile, Docker, and Generative AI practices.

MEAN Stack Web Development Trainee - NTI

Jul 2025 – Oct 2025

Government Scholarship, Mansoura

180+ hours covering MongoDB, Express.js, Angular, and Node.js; built REST APIs with authentication and middleware, and Angular applications with routing, reactive forms, and SSR.

Projects

MoneySphere - Personal Finance Tracker

MERN Stack, AWS Amplify, EC2, RDS (PostgreSQL)

Won 1st place in the ITI branch-level hackathon by taking a Personal Finance Tracker from idea to a deployed MVP in under 24 hours; used AI tools (ChatGPT, Claude, Cursor, Antigravity, Gemini, Stitch) across planning, system design, and development, and deployed on AWS Amplify (frontend), EC2 (backend), and RDS for PostgreSQL (database).

Pharma - Clinic Management System	Django, Django REST Framework
Developed a full-stack clinic system with role-based access for Patients, Doctors, Receptionists, and Admins; implemented an end-to-end appointment workflow (booking, rescheduling, cancellation, check-in) with a live doctor queue ordered by check-in time, linked consultation records with diagnoses and nested prescriptions, and admin analytics with filtering and CSV export.	
Sonesta - Hotel Management System	Laravel 13, Inertia.js, Vue 3
Implemented a full-stack hotel management system with role-based dashboards for 4 user roles and 15+ granular permissions, API authentication with Sanctum, server-side TanStack tables, and Chart.js analytics dashboards.	
Vue 3 Shop - E-Commerce Storefront (Preview)	Vue 3, Vite, Tailwind CSS
Built a responsive storefront with reactive state management and dynamic routing; implemented a live-stock interactive cart and a 60fps pure-CSS 3D animation system on product cards.	
Quizzzy - Quiz Management Web App (Preview)	Vanilla JavaScript
Engineered a quiz engine supporting 15+ questions per session with automated 100-point scoring and dynamic question rendering using pure JavaScript.	
Chefio - Full-Stack Recipe Sharing Platform (Preview)	Next.js 14, TypeScript
Designed and developed the front-end for a recipe sharing platform (University Graduation Project) with recipe discovery, social interactions (likes, follows, sharing), and advanced filtered search using the Next.js 14 App Router.	

Technical Skills

Programming Languages	Programming Concepts
JavaScript (ES6+), TypeScript, Python	OOP, Data Structures & Algorithms, Design Patterns, Clean Code
Front-End	Tools & DevOps
React.js, Next.js 14, Angular, Vue.js, Redux, HTML5, CSS3, Tailwind, Bootstrap, SSR, Responsive Design	Git, GitHub, Docker, Linux/Ubuntu, Agile Methodology, Unit Testing
Back-End & Frameworks	Generative AI
Node.js, Express.js, PHP, Laravel, REST APIs	Prompt Engineering, AI-assisted Development
Databases	
MongoDB, Mongoose, MySQL	

Volunteering & Leadership

Vice Team Leader & Operations Head - Youth Leading Youth (YLY)	Jun 2024 – Jun 2025
- Led cross-functional team management across Operations, PR, HR, Media, and R&D committees as deputy of the Matrouh chapter. - Organized high-profile government events, including an official ministerial visit, coordinating directly with the Governor and Ministry Undersecretary. - Honored with two ministerial shields by Egypt’s Minister of Youth and Sports for leadership and community impact (2025).	
Logistics & Tech Committee Member - GDG Delta	2025 – Present
Supporting technical sessions and event logistics for community developer meetups.	
Volunteer - Creativa Innovation Hub	2025 – Present
Supporting ITIDA-hosted training sessions with technical setup, attendee registration, and session documentation; producing promotional content for the hub’s digital channels.
